

## Copper Cordell

March 24, 2026

Hello, this is Copper. He was always full of energy, and loved playing in the snow and his baby swimming pool. He could also chew through anything and loved to destroy any socks he could find, but shoelaces were his weakness...he was a big cuddler and always had to be physically touching me to go to sleep, usually laying across my face. We all loved his energy and spunky attitude and will miss him and the sound of his paws running down the hallway at full speed, and that husky back talk. We Love You Copper top!!
