

## Pippa Jane Downing

April 23, 2026

Pippa Jane Downing was the fourth Schnauzer in her family. She was always the happiest and sweetest girl, and she loved everyone she met. She had a wonderful temperament and never got upset—unless one of her younger fur-siblings stepped on her in bed, at which point she would transform into a “grizzly bear” for just an instant. Pippa battled Cushing’s Disease for three and a half years, but it never took away her spirit.

Pippa celebrated her 12th birthday and passed away two days later. She is survived by her parents and her two fur-siblings, Phoebe and Bolt. She will be forever missed and will always be in our hearts. 🐾🐾
