

Severus

October 14, 2025

Severus came into our lives when he was about 3 months old in the form of a birthday gift. He immediately fit right into our family. Our Chihuahua, Buffy, was very welcoming but Severus was not set on her at first. He and Belle became close very quickly and she misses him dearly. However, he and Buffy formed such an awesome bond, it was sure something to witness. Buffy likes to fetch her "baby", well so did Sevy. They would both race to get Buffy's baby first. She sure is missing her buddy. Though Akosha is a bit of a loner, she still misses you, too.

Sevy was our love bug, always showing affection and so friendly when we had company over, he loved the pets. He had many human companions that love and miss him greatly!! He did have a thing for feet though, he attacked feet like he was ready to completely mutilate them... in the middle of the night, while sleeping. His love for us made up for it, though. Even though he was taken from us after 3 short months, he will forever remain in our hearts and our memories.
